## PAINTING YOUR HOUSE THIS YEAR?

Whether we do our own painting or whether we entrust the work to someone else there still remains the problem of deciding upon a colour scheme that is both attractive and likely to blend with its immediate surroundings. In so doing it must be remembered that whatever scheme we do finally choose will be under the constant critical gaze of visitors and passers-by. Therefore, as we intend the paint work to last for several years, we must be certain that the colours chosen are really suitable. These words of warning need not deter you from making a bold approach to the question of decorating, however, and you should certainly avoid taking the line of least resistance, be it merely to repeat the previous colour scheme or to borrow that of a neighbour. Try a fresh scheme that will distinguish your home and help to brighten your outlook throughout the years. On the following pages we have sketched a number of suggested ideas with detailed information on the paints required. It is not our aim that you should make your home fit into one of our schemes, but rather that they may show you a fresh approach to this interesting subject of exterior decorating.

## SCHEME NO. 1:

*Centre terrace house*

**FRIEZE, PILASTERS, SILLS, ETC.**

White

### FLOWER BOXES

Duradio – Paris Grey  
Metal Bands in Black Duradio

Paris Grey

Copper Glow

Peacock Blue

## EXTERIOR QUALITY WALPAMUR WATER PAINT

This is available in a range of shades selected from the standard range of Walpamur Water Paint. It is supplied in paste form and should be thinned with Walpamur Petrifying Liquid only. Two coats will give excellent results on brickwork, stonework, cement, asbestos cement sheeting, slate, roofing-tiles, stucco and pebble-dash which are in a dry, sound condition and not unduly porous. Instructions for the treatment of these surfaces and previously decorated surfaces are given on the container in which the paint is supplied.

Exterior Quality Walpamur Water Paint should not be applied during damp or frosty weather.

## DURADIO ENAMEL PAINT

For interior and exterior painting work, Duradio Enamel Paint can be relied upon to give a superlative high gloss finish. It is made from the highest quality pigments ground in a specially prepared medium. It forms a tough, elastic film possessing exceptional resistance to atmospheric conditions and is thus particularly suitable for the protection of surfaces liable to corrosion and decay. Duradio can be applied to most types of surface, such as wood, metal, stone, dry neutral plaster, wallboards etc., both inside and outside the home. It is supplied ready for use in a wide range of colours, all of which are intermixable.
